

*“I hope you have lots of room
for your AR amplifier.
Because there are lots of people
standing behind it.”*

*Jim Wilcox
Sales Manager
AR Modular RF*

We make amplifiers and modules with up to 3,000 watts of power packed inside them. But one of the most unique things about AR products is what's behind them: a support system unlike anything else in the world!

I've only been at AR for a year. But one of the things that really impressed me—and continues to impress me—is the way everyone works together as a team.

Different departments interact with one another, sharing ideas and solving problems. Everyone's input is welcome. And everyone feels like their contribution counts.

The result of that team spirit is that everyone pulls together to solve clients' problems and meet even the most demanding deadlines. So when you buy an AR product you not only get something that reflects the best thinking of the best people in the industry, you get a whole company of outstanding professionals standing behind it. Doing whatever it takes to help give you a competitive edge ... for as long as you own AR equipment.

That's a lot of support. I just hope you've got room for all of us.
